

TOWN OF NEWTON

PUBLIC SERVICE ANNOUNCEMENT

HYDRANT FLUSHING

The hydrant flushing program for all fire hydrants on the Town of Newton water system will begin on Saturday October 19, 2019 and run through Friday, October 25, 2019. The flushing for the water customers in Sparta and Andover will be conducted on Saturday, October 19, 2019, between the hours of 7:00 a.m. and 3:00 p.m. The flushing for the water customers in Newton will be conducted from Sunday, October 21, 2019 through Friday, October 25, 2019 between the hours of 10:00 p.m. and 6:00 a.m.

The flushing schedule will be interrupted only for inclement weather or emergency utility work. We apologize for any inconvenience that may be caused by the flushing operations.

During the above dates, water customers may experience low water pressure or discolored water. These conditions result from the dislodging of materials in the water distribution mains. The discoloration of the water is not harmful and will disappear shortly. However, **it is strongly recommended that water customers refrain from laundering clothing while the water is discolored.** Washing clothes with discolored water, which is caused by iron, may result in permanent stains on some fabrics.

Flushing of all fire hydrants in the water system is a regular operation of the Newton Water Department, which is generally repeated twice each year during the spring and fall seasons to prevent a heavy build-up of iron in the distribution lines.
